

Sustainability!

NEW! NEW! NEW!

Winterfold is working very hard to reduce our carbon footprint. Educating our students to look after their world is extremely important to us and we are beginning to become even more proactive in this area, as a whole school community.

So, we figure that your children may soon start coming home and educating you about how to save the environment. We wanted to give you some information that you can keep handy. That way, you can show them that you're interested in looking after our world and that you know what you're talking about too! You will find some interesting facts, tips and tricks in each newsletter not just to tell your children, but also so that we can all do our best to look after our world together!

FACT: Did you know Perth's water supply comes from 3 sources?
Dams, Groundwater and Desalination.

Last Thursday, a group of students from Years 4 - 6 attended a Millenium Kids workshop. We have some budding environmentalists and future Prime Ministers in the making! The students worked sensationally and came up with some great suggestions to lower our school/community carbon footprint. Some students are even 'pitching' their amazing ideas on Thursday, June 16, and could be in the running to win \$350 towards making their idea happen.

Watch this space for further updates, school sustainability projects and other interesting facts.

UNIFORM SHOP NEWS
